

Raki Patel, Wigmore - 2009

"Clive is a highly skilled and professional chemistry teacher who taught my eldest daughter to achieve her A* in Chemistry and Biology at AS & A levels which enabled her to go on & do dentistry at university.

Clive has a great way of transferring knowledge to kids and he does so in an enjoyable way which makes it both practical, informative and fun. He will work with kids of all abilities to help them maximise on their potential which can span right across the grade spectrum.

My daughter needed to get highest grades possible and she got those with Clive's help. If your kids need help I would urge you and them to speak with Clive as quickly as possible as he is also highly sought after."
