

My daughter and I contacted Clive for AS/A2 biology tutoring in August 2014. Clive has tutored my daughter for almost a year and she has benefited greatly from his help and support, especially in exam technique.

He started by giving a detailed overview of the syllabus which plugged the gaps in my daughter's knowledge. He helped her to look beyond the confines of the syllabus and to have a broader appreciation of the subject.

After Christmas and in the run up to the exams, he thoroughly prepared her in answering exam questions and provided many print outs of past papers. He gave her an appreciation of what examiners would be looking for and helped her to construct model answers.

We found Clive to be punctual and reliable. He was flexible in the times that he could tutor and was willing to come more frequently in the run up to the exams.

Above all, we found him pleasant, humorous and very easy to get along with. I would definitely recommend him as an A level biology tutor.
